

# TESTIMONIALS

*'As a Tenement Manager, I rely on particular pieces of software to run the complex day to day tenement management requirements. When **GeoSearch** immediately alerted me to a surrender of one of my Tenements, I was understandably concerned. It was one of our key Mining Tenements, and I knew I had not lodged a surrender. After contacting LandTrack Systems, they were super supportive and quick to respond to what had happened. I was able to have the error rectified with the Mines Department, ensuring that our tenement was indeed safe, and the 4 applications lodged would go no further.'*

*Kathryn Todd - Tenement Manager - Mining Industry; Used in Northern Star Case Study*

*'I use **LandTracker Maps** on a daily basis to monitor our projects that span across multiple jurisdictions. Having the current spatial data available in one location for all our projects enhances my own productivity and time efficiently through the design of this simple yet effective program.'*

*Adam Groeneveld - Senior Land Coordinator - Sandfire Resources NL*

*'We were looking for an easier way to record our tenement expenditure (**Expenditure Watch**) and to generate necessary reports. Landtrack took the time and then provided the resources to work with us to ensure the software met our specific requirements. I am very impressed by their product, and the level of service that they continue to provide'*

*Dean Gourdis - Office Manager - Nu Fortune Gold Limited*

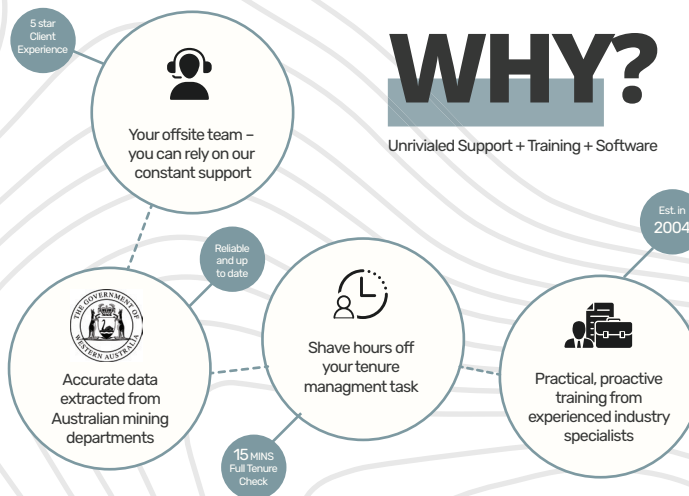

*"I found LandTrack Systems **Tenement Management Wiki** of great use given the need to understand compliance matters across multiple Australian States. Interacting with the LandTrack Systems support team and other LandTracker users via the Wiki was a great environment to learn and improve one's lease management skills."*

*Andrew Harwood, Senior Geologist, Evolution Mining*

*I have now attended two courses - "**Practical Tenement Management**" and "Year in the Life of a Tenement Manager". Both have been invaluable. Like many others, I've found myself managing tenements almost by default, training myself by going through the files to see what has been done before, and asking anyone I can find who may know something about what I am trying to achieve.*

*I really want to thank LandTrack Systems for offering training in Tenement Management in WA. They are the only ones doing it, and it fills a much needed gap in the market. The courses are run over a couple of days, 6-8 people on a course, 3-4 different lecturers all offering their expertise, and held at an easy-to-get-to location in West Perth.*

*Sue Macintosh - Administration & HR Manager - Top Iron*

## ABOUT US

At LandTrack Systems, we're a team of resourceful software specialists. We're defiantly different because we believe in prioritising people and relationships ahead of everything.

So, yes, we're Agile and innovative. In fact, our ground-breaking software has been keeping Australian miners compliant and protecting tenure since 2004. But we're also talented educators who are relentless in providing superior support for you - our clients.

# LandTrack Systems

Improved compliance performance, profit and productivity with our specialised training, tools and support

## EXPERTISE

We've been trailblazers in Australian mining compliance solutions and tenement management since 2004.

## TRAINING

Our specialised training courses prepare you for ALL the practical requirements of managing compliance and protecting tenure.

## SOFTWARE

Our industry-leading software is designed to save you time and money, while you keep your resources secure.

## Expenditure Watch

### Software to Monitor Tenement Expenditure Commitments

Ditch your last-minute deadline panic

*Expenditure Watch is a powerful planning tool that lets you prepare for your minimum expenditure deadlines and prevent tenement anniversaries sneaking up on you.*

Tackle all your Form 5 reports with ease

*You can stop treating corporate governance as a separate task – Expenditure Watch creates an audit trail for every transaction – you'll never sweat through an audit again.*

Know how every tenement is travelling at any time

*You can refresh and review your reports in minutes with accurate data so anyone can quickly see how much you need to spend, on which tenements and by what date.*

## LandTracker

### Mineral Title, Agreements & Environmental Mining Compliance Software

Be confident in your Corporate Governance and risk mitigation

*You will have visibility of and be able to meet shareholder and other stakeholder obligations under compliance law.*

Save hours of manual data entry and error checking

*Tenement data automatically imported direct from key government databases around Australia and is updated on demand. You'll have more time to devote to your compliance task lists so you're working productively with your data – not on it.*

Secure your business processes

*Configure LandTracker to reflect your business processes, ensuring continuity of data across departments and staff.*

## TRAINING

### Best WA Mining & Tenement Compliance

Understand environmental compliance essentials

Delve into your tenement management role

Grow your tenement management expertise

Successfully manage your tenement expenditure

Become a LandTracker pro

## FREE TENEMENT TOOLS

### LANDTRACKER MAPS

Free tenement mapping based on Google Maps. Use from your desktop or smart device to view tenements and surrounding holdings Australia wide.

### TENEMENT MANAGEMENT WIKI

A tenement Management Wiki resource created to support & educate anyone whose role involves tenement management in Australian mining and exploration

## Tenement Safety Net

### Australia's Best Tenure Protection Report

Never miss a critical action again with our early warning reports

*Our reports help you comply with the Mining Act requirements and avoid losing tenure. They're designed to present all your essential actions in one place, to simplify and speed up your review process.*

Get flexible, tailored data that aligns with your internal processes

*You can choose the number of tenements to track and the frequency of your Tenement Safety Net reports from weekly, fortnightly or monthly – whatever suits you best.*

Super easy sharing helps you stay ahead of your deadlines

*Avoid unnecessary internal hold-ups for deadline-driven actions. Share compliance status across your company for continuity of critical action management*

## GeoSearch

### Land Monitoring Alerts to Sharpen your Competitive Edge

Avoid the long-term costs of being squeezed out

*GeoSearch alerts mean no more missed opportunities for ground acquisition –based on area changes and dropped tenements.*

Get timely information direct from the source

*Our unique spatial-based alerts extract essential monitoring data directly from key government databases – updated daily so you can trust the information is accurate.*

Say goodbye to hours spent on manual monitoring

*Alerts are sent out automatically as soon as areas change, tenement expire, holders change and if more changes are detected.*
